PROJECTS

Content Management Dashboard (Laravel - Filament)

Built a responsive admin panel for managing articles and users using Laravel Filament. Included authentication, CRUD operations, and advanced filtering.

Simple CRUD Web App (Full Stack)

Backend with TypeScript, PNPM, TRPC, PostgreSQL (Docker). Used Kysely for queries and Zod for validation.

OBS | LMS – Learning & Management System

A full-featured university Learning Management System with dashboards for Admin, Teachers, and Students.

Includes departments, courses, course offerings, attendance, assignments, exams, and grades.
